

### **1.3.1 Institution integrates cross cutting issues relevant to Gender, Environment and Sustainability, Human Values and Professional Ethics into the Curriculum**

V.S.M College (A) considers that the purpose of education is to make each learner recognize their identity, understand the purpose in life through their connection and contribution to society, environment and to their fellow human beings. The art of holistic education lies in the institutions' responsiveness to offer diverse curriculum for promoting students to imbibe intrinsic reverence for life and passionate love of learning. Under the structure of autonomy the institution could consider the significance of the world's pressing conditions and problems, such as environment, climate change, politics, socio-economic and Gender issues.

Trees help the environment by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe. Tree-planting is the process of transplanting tree seedlings, generally for forestry, land reclamation, or landscaping purpose. It differs from the transplantation of larger trees in arboriculture, and from the lower cost but slower and less reliable distribution of tree seeds. We need them for oxygen and good health. Trees also help to control pollution: They absorb carbon dioxide. They improve our environment. They cause rainfall and protect water resources under the ground.

VSM college (A) organized the environment day on 5<sup>th</sup> June 2019 World Environment day is celebrated on 5<sup>th</sup> June every year and is the United Nations Principle vehicle for encouraging awareness and action for the Protection of the environment.

### **Self defense training program:-**

Self-defence training is one of the most needed and must for every woman's to-do list. In the crime world, self-defense training is suggested, so that the women can resist any kind of sexual assault as well as random attacks. Self-defense training believe these courses will not only provide women with the physical survival techniques necessary to repel attacks effectively, but that this kind of training will also help to prevent future violence by developing traits such as assertiveness and confidence in individuals. There is evidence that women who convey such characteristics are less likely to be victimized. Opponents argue that self-defense training does not properly prepare women for an attack, does not adequately address acquaintance rape threats, and can provide a dangerous false sense of security to students. V.S.M College(A) conducted self-defence training program for girls students from 16<sup>th</sup> September 2019 to 5<sup>th</sup> October 2019.
