Date: 12-07-2015

**NOTICE**

Environmental pollution is becoming more severe by the day, posing serious health risks and endangering the lives of all living creatures on the planet. As a result, I sincerely urge all members of the faculty and student body to take personal responsibility for “protecting the environment only to protect ourselves.” As a result, you are strongly advised to take college buses instead of driving yourself to class in order to reduce the threat of environmental pollution.

Date: 08-04-2019

**NOTICE**

This is to inform all staff and students that we should take the initiative to ban plastic (completely) in order to combat plastic pollution on campus. What we really need is a shift in attitudes to make plastic pollution a thing of the past. We must put an end to the widespread use of plastic in all of its forms. We must practice using jute or cloth products for a variety of applications. We can protect natural resources if we successfully implement the 3Rs, “Reduce, Reuse, and Recycle.” Hence, I request you all to make our campus plastic-free.
