

VSM COLLEGE (A) :: RAMACHANDRAPURAM

Autonomous Affiliated to AKN University

Re-accredited by NAAC with 'B' Grade.

REPORT

ON

ACADEMIC EXCELLENCE

For the Academic Years: 2015-2020

Academic Excellence

Academic achievement is important because it prepares students for future careers. It also allows students to enter competitive fields. Academic achievement is often a sign of a refined intellect, which can help students in all areas of their lives. Academic achievement also allows students to enter competitive fields.

Those who wish to enter the medical field need a thorough educational background in biology, and engineering certification requires adequate educational credentials. Those looking to enter academia need strong academic achievements.

Academic achievement also helps shape the minds of students. Knowledge about history helps people interpret news events while mathematical knowledge helps people learn about logical thinking. Critical thinking also helps people interpret the world around them, and colleges place an emphasis on teaching students how to work through problems. While the lessons learned in class give students specific skills, the process by which they learn this material and the original ideas they are asked to consider have an effect on many aspects of their lives as well. Academic excellence is the demonstrated ability to perform, achieve, and / or excel in Activities. Academic excellence has been identified with achieving high grades and superior performance. It is the maximum development of student intellectual capacities and skills in service to humanity.

Importance of Academic Excellence:

- **Achieving academic excellence is a process of both formal and informal education. Indeed, education is a limitless and unending process to be enjoyed for a lifetime.**
- **As you begin your college career, consider the following suggestions which can help you achieve academic excellence.**
- **Select a major which has a strong basic curriculum as a course of study.**
- **Complete a strong liberal arts and science background in addition to your major field of study.**
- **Learn to use the library and use it often, since it offers a wealth of historical and current information which can greatly enhance your classroom experiences and your general understanding.**
- **Develop self-confidence, persistence and leadership abilities.**
- **Develop an attitude of social responsibility and an understanding of cultural and intellectual differences. Participate in honors and enrichment programs.**
- **Select friends who are dedicated students and are serious about their grades.**
- **Learn efficient management of your time.**
- **Participate in summer enrichment programs such as industrial Co-op programs, summer research programs, youth hostels, travel programs, or internships.**
- **Attend lectures, concerts, art exhibits, theatrical performances, seminars, and other cultural activities whenever possible.**
- **Get involved in a club or activity directly related to your major as a means of meeting other students, faculty and professionals in your study area.**
- **Assume leadership roles as a committee member, chairperson, or officer to develop qualities for success in future career endeavours.**
- **Seek opportunities to work with professors on special projects in a research or teaching area of interest.**
